Product Highlights

NK Vue[®] Tube / NK Vue[®] Gold

NK Vue is the first commercially available test to check NK cell activity. It is a simple and affordable blood test that requires only 1mL of fresh whole blood. It measures the amount of IFN- γ secreted by NK cells after activation, which can help to quantify the competency of innate immune system to defend against viral infections and cancerous cells. NK Vue Kit was approved by the MFDS (Ministry of Food and Drug Safety) Oct 2012 and was recognized as a Novel Health Technology after NECA's assessment (National Evidence-based healthcare Collaborating Agency) in June 2014.
