## Boditech Med Inc.

### Product Highlights

### AFIAS-6 (Display)

AFIAS-6 (AFIAS-automated fluorescent immunoassay system) is an automated fluorescent immunoassay system that uses blood, urine, and other samples to measure quantitatively or semi-quantitatively the concentration of targeted analyte. AFIAS all-in-one cartridges are designed to optimize the structure and operating principle of the reader. Its automated test process enables to carry out multiple simultaneous tests for six different samples. For some specified items such as TSH, CRP, PCT and HbA1c, small volume (10uL or 50uL) of whole blood from a finger or heel can be used for quantitative testing using a C-tip (capillary tip).
