

## **EUROIMMUN (South East Asia) Pte.Ltd**

### **Product Highlights**

### **Computer-aided immunofluorescence microscopy**

### **EUROPattern (Display)**

- Fully automated microscopy and state-of-the-art result evaluation at the PC screen (ANA, ANCA, Crithidia, tissues, EUROPLUS – also as Mosaics)
- Pattern recognition for ANA and ANCA, including combinations of patterns, with titer designation
- Fast, automatic processing of up to 500 (or 1,000) analysis positions successively – up to 200 fields in only 1 hour
- Automatic identification of slides via matrix codes, Archiving of images and results
- Pencilless entry of findings and consolidation of results for each patient
- Real-time access to images and microscopy, Complete integration into existing laboratory software(LIS)
