

## Wisemeditech, Inc.

### Product Highlights

#### wise-ATS2000 (Display)

wise-ATS2000 is a tube sorting system that automates sorting process of pre-analysis and post-analysis and tube receiving in the diagnostic laboratory. It performs high-speed processing (more than 2,000 slots per hour) and tubes are grouped based on barcode recognition and the LIS tube information

#### BC · ROBO-8000 RFID

BC · ROBO-8000 RFID is the newest model of Test Tube Preparation System with RFID printer option. The system produces kits with correct tubes and correct barcode labels along with a worklist.

- Touch panel display, Label auto-loading function and Wrong tube loading detector realize safety, ease and accuracy.
- Modular concept with 4-30 tube type meets a variety of needs. Tailor made system selectable depending on customer's operating environment and usage.
- Intelligent Carriage enhances back up function in case of sudden mechanical error.
