PHARMODE CO. Ltd.

Product Highlights

Hemovister® (Display)

Hemovister® is an in-vitro medical device that measures both whole blood viscosity and plasma viscosity using patient's whole blood sample of 3ml.

The device can be used in clinical diagnoses for hyperviscosity syndrome and in clinical prognosis for cardiovascular, cerebrovascular and peripheral vascular diseases. In addition, it can be used to monitor and guide existing therapeutic treatments. Such that the event outcomes and healthcare cost can be reduced.
