Product Highlights

STA R Max System

STA R Max is an analyser designed for high volume laboratories. Innovative and scalable and brings productivity and reliability to laboratories for their routine and specialised Haemostasis assays.

Its new software features will bring security, traceability and expertise to every lab: user rights management to deal with staff authorisations, audit trail feature, Expert rules to standardise patient results validation and tools to support accreditation process.

※ Thanks to Viscosity-Based (Mechanical) Detection system, the results are insensitive to any type of coloured plasma, maximum precision for weak clot detection
